

Dear Sir/Madam,

Quick comments as I'm very busy and up against your noon deadline.

Please address climate change as the biggest factor in your consideration of a NPF up to 2040.

Reduce one-off housing build in the country-side to reduce environmental impacts.

Put more funds into public transport/cycling/walking than roads. (Citizens Assembly recommendation on climate change)

Address all recommendations from that assembly re climate change.

Increase development in regional cities. Reduce development in Dublin which is far too big for the country.

Do not take water from the Shannon to use in Dublin.

Decarbonise electricity generation. Stop peat burning in the midlands and move workers to renewable energy jobs.

Thanks & regards,

Eric Conroy,

Member An Taisce & supporter of Friends of the Earth.
