Draft First Revision to the National Planning Framework

Date Created: 12.09.2024 - 16:42

Observations:

4. Making Stronger Urban Places

Chapter: 4. Making Stronger Urban
Places

The framework fails to sufficiently consider all key aspects. In particular anois wish to to highlight its failure to deal with dereliction. Dereliction is blighting our country and needs to be tackled strategically, as well as on a policy, practice and cultural level, as highlighted by the internationally recognised #DerelictIreland campaign.

Irish urban environments are not fit places to raise a family. Dominated by heavy traffic, lack play and green areas. This is insufficiently addressed.
